Re: docket # 98P-1194

Dear FDA Dockets Management Branch,

I am writing to express my deep concern with the use of rBGT in milk producing cows. Test data that I have read shows links to possible disease conditions, and makes me worried about the safety of millions of children + adults consuming rBGT-inoculated dairy products.

I support the lawsuit filed by The Center for Food Safety, including the removal of rBGT from the market. Most consumers are ignorant both of the presence of rBGT in their dairy foods + of the dangers. It is not fair to expose them to this substance.

I would like to see an immediate end to the

98P-1194

(use) **C84**

use of rBGT in the human food chain.

Thank you for your consideration.

Sincerely,

Deborah Bnye
